

1. Fold back the four outside triangles along the dotted lines, so that they meet and form a square on the other side.
2. Now fold in the next four triangles on the bold lines so that the point of each one reaches the centre. At this point you should find that only the numbers are on the front and the colours are on the back.
3. Turn your chooser over, fold it in half and then into quarters, and finally open out these last two folds. You should now be able to insert the finger and thumb of your right hand under Red and Yellow and the finger and thumb of your left hand under Blue and Pink.

Walk around the room. When you meet someone, ask them to choose a colour. Spell out the letters of that colour by opening and shutting the chooser. Next ask the person to choose a number from those that are revealed. Read out the question, then open up the number to reveal the answer and a Bible verse to check out together!
